Site is composed of water, land and structures. TWO, PROBABLY THREE DIFFERENT TYPES OF WATER.

FIRST TYPE OF WATER IS PART OF WATER LAND INTERFACE. THE LAND HERE IS SOFT AND HAS A FLUIDITY FEELING. SECOND TYPE OF WATER IS ENCLOSED IN A MAN MADE, PROBABLY CIRCULAR, STRUCTURE. THIRD TYPE OF WATER MAY ALSO BE PRESENT. THERE ARE STRUCTURES HERE. TWO OF THESE STRUCTURES (ONE HAVING A down FEELING AND THE OTHER HAVING AN up FEELING [NFI]) are interrelated, possibly physically.

STAGE TWO SUMMARY area is colorful. Blue and green are primary colors. There are also other blues and green along with white, orange, tan, bronze, yellow, red, pink and olives. THERE IS A SALTY FEEL AND A SWEET SMELL, THAT REMINDS ME OF NOT TOO UNPLEASANT SMELLING FERTILIZER. TEMPERATURE IS WARM AND STICKY. AREA FEELS OPEN AND wide, BUT BOUNDED SOMEHOW (NFI).
